Revolutionise your manufacturing with Cambrian Vision

UR+ Certified

Cambrian Vision is tested and certified by Universal Robots

Cambrian Vision is an advanced AI-based vision solution for your automation applications

Quick to install and connect with any major robot brand

Robust for external light conditions

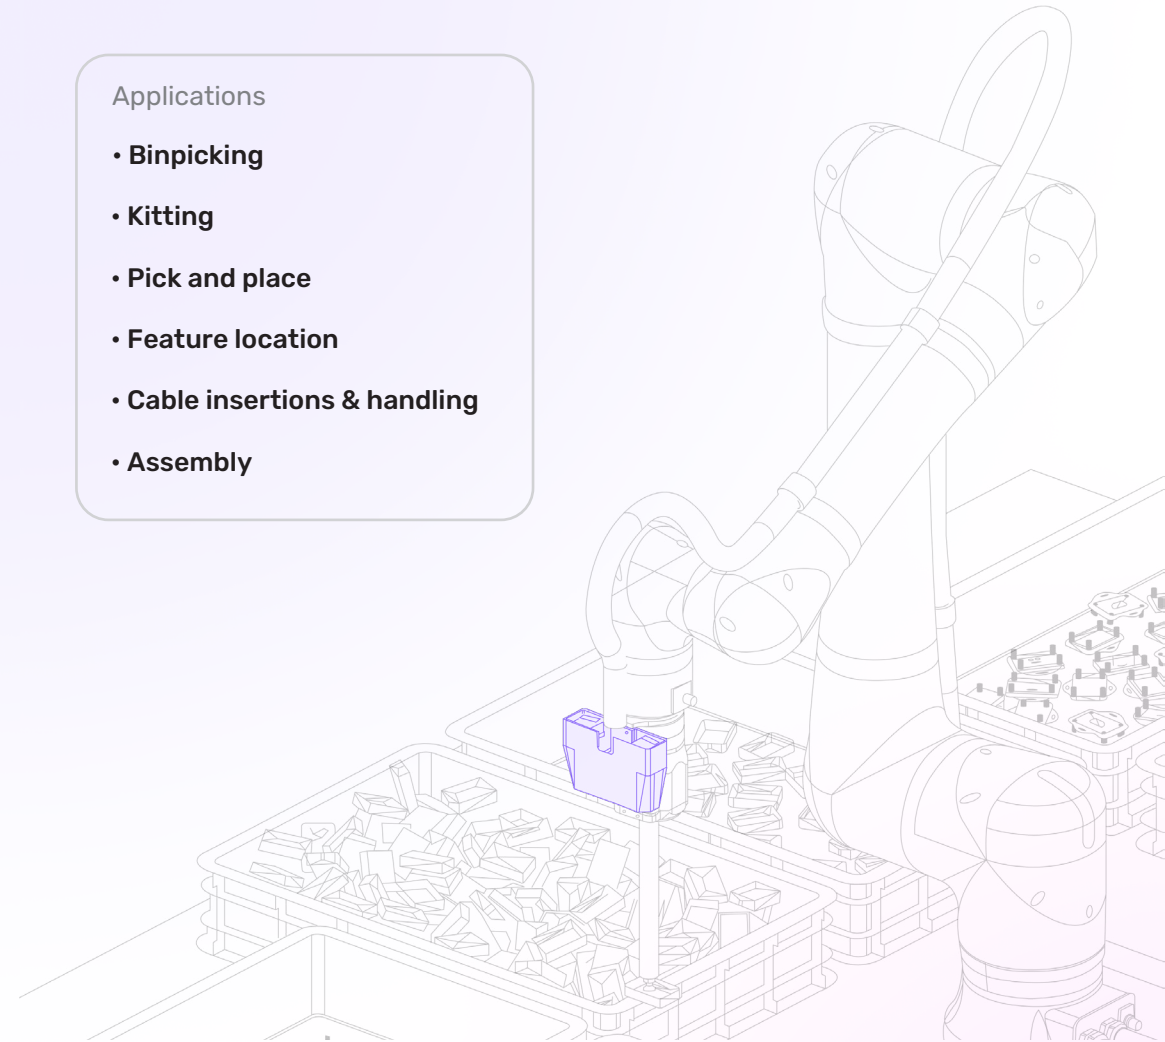

Sub mm accuracy

Fast prediction time < 200ms

Pick wide range of parts, transparent, plastic, shiny, metal, etc.

Applications

- Bins picking
- Kitting
- Pick and place
- Feature location
- Cable insertions & handling
- Assembly

Be resilient for a changing environment

Robots don't get Covid.
Avert global supply chain issues.
Bring low-cost production back to mainland.

Improve quality

Cambrian Vision doesn't get tired and is consistently accurate.

Free workforce for more productive tasks

While AI enhanced robots perform the most mundane tasks, workers are freed for more productive tasks.

Reduce costs

A robot arm equipped with Cambrian Vision can do many tasks 24/7, at a lower cost than any alternative.
